

Our Teaching Philosophy

Little Learner Children's Academy theme-based program is designed to provide children with experiences that encourage growth in all areas of development by involving them in their environment. A 'theme-based' curriculum is usually defined as a set of activities or projects that all relate to a larger concept or broad topic, facilitating children's understanding from multiple angles while engaging different learning styles. Our setting includes the necessary materials for children to learn important kindergarten readiness skills and concepts to prepare them for the next level of their education. Programs such as "Letter of the Week" and "Number of the Week" helps to equip our students with the essential building blocks of learning.

Ready to make a connection?

Preschool2me connects parents and childcare providers through digital daily reports, photos, and messages.

Our Staff

Our teachers are thoroughly trained and screened. All of our teachers have earned a degree in Early Childhood. We require continuing education throughout the year to assure our teachers are excelling. Our teaching staff provides a loving, caring environment for children to learn and grow.

Our Mission

Little Learner Children's Academy's goal is to provide enriching opportunities to meet the needs of children in the community. Our mission is to provide children with a learning environment and wide variety of experiences that help them develop socially, intellectually, physically and emotionally in a manner appropriate to their age and stage of development. We recognize the uniqueness of the individual child, family, and the community in which we reside.

Our Philosophy

We treat the children in our care with respect and strive to instill within each of them a love for themselves and others, as well as a love for learning. We believe that children learn by doing. We operate a developmentally appropriate program that provides each child with many large group, small group and individual experiences.

We believe that parents are the primary teachers and role models for their children.

Curriculum

Our curriculum reflects guidelines and practices advocated by the National Association for the Education of Young Children. Lesson planning for the classroom is based upon developmentally appropriate practices and enhances all areas of children's development; cognitive, physical, social and emotional.

Goals

- To add to their knowledge and physical, social, and emotional development by observing and interacting with peers, adults, and materials
- To increase a child's knowledge of, and ability to become involved in and make sense of the world by doing, interacting, exploring, and experiencing
- To enhance their performance in group experiments and projects, independent exploration time and group reading
