

FINGERPRINT LAB

You will need:
Lotion
Clear glass container
Baking soda
Paint brush or makeup brush
Packing tape

- 1. Clean the outside of the glass container.**
- 2. Rub lotion on your hands, making sure you get it on your fingertips.**
- 3. Spread your fingers and press the tips on the glass container.**
- 4. Pour a thin layer of baking soda over the fingerprints on the glass.**
- 5. Lightly dust the prints with the brush.**
- 6. Place a small piece of packing tape over the fingerprints, one at a time.**
- 7. Lift the tape carefully, and place the tape onto a black square below.**
