

SECURITY

Sometimes you need to send a message to another spy, but you don't want other people knowing what you are saying. This is a way you can create a secret code that only you and your friend will be able to decipher.

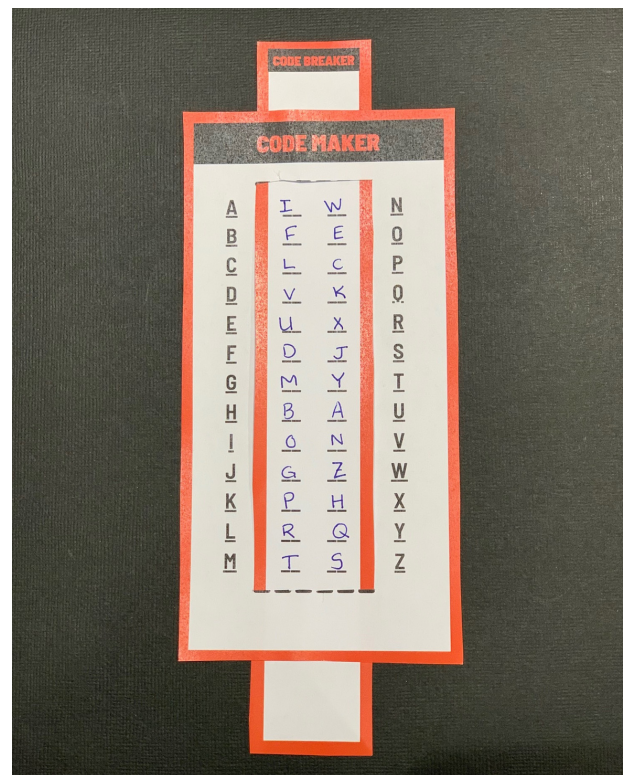

You will need:

Code Maker and Code Breaker templates (included)

Scissors

Something to write with

1. Cut out each of the Code Makers and Code Breakers. Carefully cut along the dotted lines on each of the Code Makers.
2. Insert the Code Breaker through the dotted lines of the Code Maker. Line up the lines with the letters.
3. Randomly write the letters of the alphabet on the lines of the Code Breaker, making sure not to repeat letters.
4. Repeat the process with the second Code Maker and Code Breaker, using the same letters so you have two identical Code Breakers.
5. Give the second Code Maker and Code Breaker to another spy. Now you can write messages back and forth using your own secret code.

Use the code breaker pictured above to decode this message:

MEEV RALP IWV BINU DAW!
